

Railbelt Reliability Council Webinar to Introduce the Integrated Resource Plan

The Alaska Railbelt Reliability Council (RRC) invites you to a public webinar on **January 8, 2026, at 12:00 p.m. AKST**. This session will provide the public with an overview of the Integrated Resource Plan (IRP) process and explain how to get involved.

This is the Railbelt's first-ever IRP — a comprehensive, long-term strategy for ensuring that the power system serving most Alaskans stays reliable, affordable and ready for the future.

Over the next two years, the IRP process will include public meetings, technical workshops and opportunities for Alaskans to ask questions and share feedback. The final plan is expected to be submitted to the Regulatory Commission of Alaska in early 2027.

Don't miss this chance to learn more and participate in shaping Alaska's energy future!
