

August 2026

Coyote 3SX

PROJECT DESCRIPTION

The Coyote 3SX development on State of Alaska land in the Kuparuk River Unit marks another important milestone in the company's long-term commitment to responsible energy development on Alaska's North Slope. By leveraging existing infrastructure, Coyote 3SX brings new resources online efficiently while supporting Alaska jobs, strengthening throughput in the Trans-Alaska Pipeline System and generating meaningful benefits for local, state and federal governments.

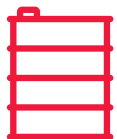

First oil for Coyote 3SX was delivered ahead of schedule and under budget.

October 2025
Funding approved

Early 2026
Construction began

August 2026
First oil

Coyote 3SX by the Numbers

12 MBOD
Peak production (gross)

19
Development wells

~20
Miles of new pipeline

~365
Employees at peak construction

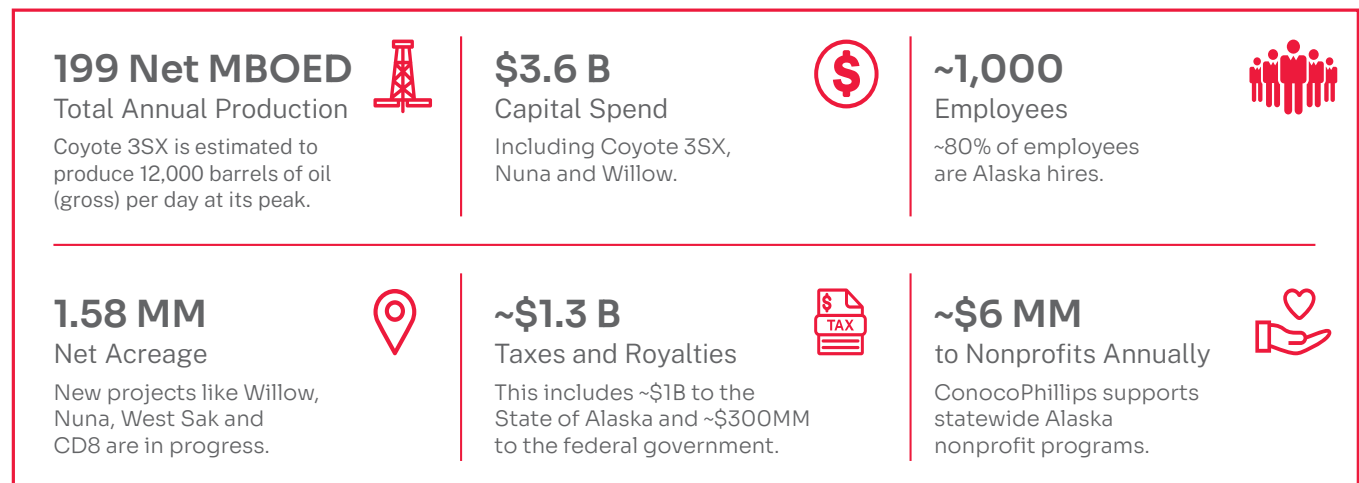

~\$800 MM
Investment

Committed to Alaska for More Than 50 Years

ConocoPhillips Alaska has been a leader in Alaska’s oil industry for more than 50 years. The company and the successes of its heritage companies date back to the greatest oil discoveries in the state’s history.

Every year, we work to further develop the oil fields we’ve discovered and, in some years, explore for new ones. The company is committed to operating with the highest safety standards, responsibly developing Alaska’s resources, promoting economic opportunity for Alaska and being a valuable community partner.
